

HIGH RESOLUTION COLOR MAPS BASED ON SCANNING TECHNIQUES

SCAN N PAINT 2.2

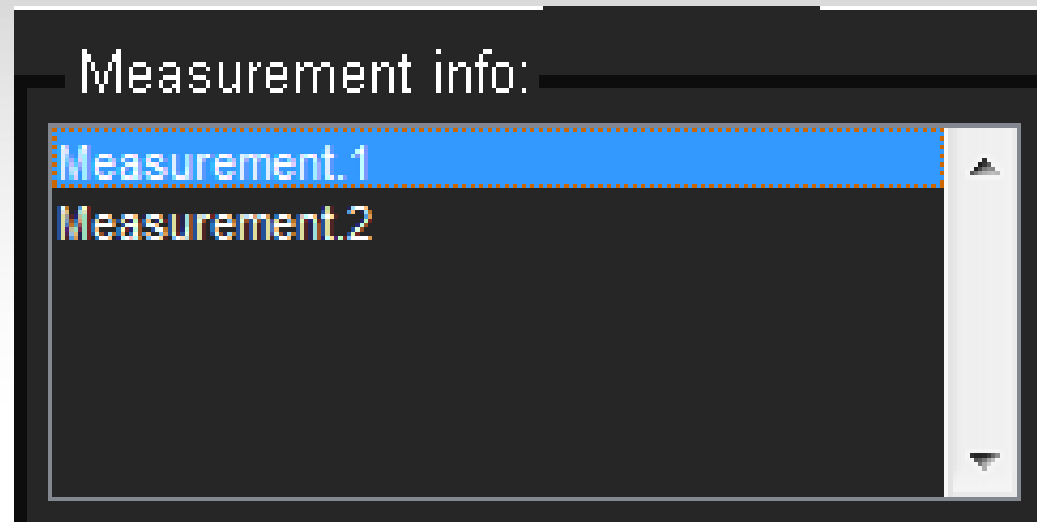

New features:

- Ready for future sub-modules, like 3D S&P and TPA.
- Multi-measurement loading
- New grid method calculation
- New multi-view display process

MULTIPLE MEASUREMENT LOAD

- In each project, multiple measurements can be loaded, only requirement: Same camera angle is kept between measurement files, and same probe configuration
- The software will combine the results of both measurements, obtaining denser measurement data.

NEW GRID METHOD

- More flexible grid configuration:

- Drag drop grid positions
- Add/reduce cell number
- Automatic color display of cell status

MULTI-VIEW DISPLAY PROCESS

- It works as an analysis buffer that can store several color map results, either from within the current project, or from different projects.
